General Tips on Growing Fruit Trees

REVISED1/27/2024

- All Fruit trees require full sun and well-drained soil. Cherry, Peach, and Plum will not survive in wet soils.
- At planting time, use Espoma's Bio-tone to help promote strong root growth.
- Varieties that require cross-pollination should be located within 50 feet of each other (side-by-side is best) to insure that bees may easily travel between the trees at bloom time.
- Remove all fruit from young trees as it begins to form for the first few years after planting to allow the root system to become fully established. Allowing a tree to bear too soon may stress the tree and reduce future fruit production.
- For top-quality fruit and healthy Apple, Cherry, Peach and Plum trees, spray with **Bonide Complete Fruit Tree Spray** during the growing season per label directions. **Dormant Oil** and **Liquid Copper Fungicide** may be sprayed as a preventive control for several insects and diseases in late winter or early spring, just before budbreak.

APPLES 5 to 15 gallon; \$88 - \$187 For best fruit set, plant at least 2 different varieties for cross-pollination Large red and green skin; creamy flesh; antique apple good for eating and cooking BALDWIN SEMI DWARF 12-15' October 12-15' mid October Crisp red apple; mildly sweet tart flavor BRAEBURN SEMI DWARF 12-15' 12-15' 12-15' Dark red skin; crisp white flesh with sweet/tart flavor CORTLAND SEMI-DWARF 12-15' early-mid Oct mid-late Sept Red blush over vellow skin; firm white flesh with sweet/tart flavor EMPIRE SEMI-DWARF 12-15' 12-15' **FUJI SEMI-DWARF** 12-15' 12-15' late Oct Pink over greenish yellow skin; crunchy yellow flesh w/sweet-tart flavor GALA SEMI-DWARF Red-orange skin; firm, crisp yellow flesh with sweet flavor 12-15' 12-15' early-mid Sept GINGER GOLD SEMI-DWARF 12-15' 12-15' Aug-Sept Pale yellow skin; crisp and mildly tart flesh Golden yellow skin; firm, light flesh with sweet flavor GOLDEN DELICIOUS SEMI-DWARF 12-15' 12-15' early-mid Oct Shiny green skin; hard, crisp flesh with tart flavor **GRANNY SMITH SEMI-DWARF** 12-15' 12-15' late Oct-Nov Firm, crisp and juicy yellow/green with red mottling tartt;good fresh and for desserts GRAVENSTEIN SEMI DWARF early-mid Sept 12-15' 12-15' HARALSON SEMI-DWARF late Sept-Oct Red striped fruit; crisp, juicy flesh with a sweet-tart flavor 12-15' 12-15' Yellow skin/red blush; crisp flesh with sweet and juicy flavor HONEYCRISP SEMI-DWARF 12-15' 12-15' early-mid Sept JONAGOLD SEMI-DWARF 12-15' 12-15' mid-late Sept Yellow skin striped with red; firm yellow flesh with sweet flavor Red skin; crisp white yellow flesh with tart flavor JONATHAN SEMI-DWARF 12-15' 12-15' mid-late Sept MCINTOSH SEMI-DWARF 12-15' 12-15' mid-late Sept Bright red skin; firm white flesh wth tangy flavor Bright red skin; firm yellow flesh with tart flavor NORTHERN SPY DWARF 10-12' 10-12' early-mid Oct Reddish pink fruit with crisp tart/slightly sweet flavor;good fresh or cooking PINK LADY SEMI DWARF 12-15' 12-15' late Oct Yellow skin with blush;sweet/tart flavor;good for cooking PRISTINE SEMI-DWARF 12-15' July-Aug 12-15' Solid red skin; crisp, light yellow flesh with sweet flavor **RED DELICIOUS SEMI-DWARF** mid-late Sept 12-15' 12-15' Dark red mahogany skin; firm white aromatic with tangy flavor SPARTAN SEMI DWARF 12-15' 12-15' late Sept-Oct SWEET SIXTEEN SEMI-DWARF 12-15' 12-15' mid-late Sept Red striped skin; crisp flesh with unusual sweet flavor Solid red skin; crisp, firm cream colored flesh with tart wine-like flavor WINESAP STAYMAN DWARF 10-12' 10-12' mid-late Oct Yellow flesh, extra crisp sweet and juicy YELLOW DELICIOUS DWARF 10-12' 8-10' Aug-Sept CHERRIES 5 to 15 gallon; \$88-\$187 Tart Cherries are considered to be self-fruitful.

Sweet Cherries require two or more different varieties for cross-pollination.

Tart Cherries will not pollinate	a Swee	t Cherr	у	
BALATON	12-15'	12-15'	late June	TART Large red truit; excellent pie cherry
BLACK PEAR SEMI DWARF	12-15'	12-15'	late June	SWEET Early and vigorous dark red truit; great for tresh eating
BING SEMI-DWF	12-15'	10-12'	early-mid July	SWEET Dark red skin; firm flesh with sweet flavor
BLACK YORK BING SEMI-DWARF	12-15'	10-12'	early-mid July	SWEET Dark red skin; firm flesh with sweet flavor
BLACK TARTARIAN	12-15'	12-15'	late June	SWEET Cherry red to purple black fruit with rich flavor;good pollinator;fresh eating
DANUBE SEMI-DWARF	12-15'	10-12'	mid-late July	TART Dark red skin; semi-firm flesh with sweet/tart flavor
LAPINS SEMI-DWARF	12-15'	10-12'	mid-late July	SWEET Dark mahogany red skin; tender juicy flesh with sweet flavor
MONTMORENCY SEMI-DWARF	12-15'	12-15'	mid-late July	TART Bright red skin; tender yellow flesh with tart flavor
NORTH STAR SEMI-DWARF	10-12'	10-12'	early-mid July	TART Bright red skin; tender yellow flesh with tart flavor
RANIER SEMI-DWARF	12-15'	10-12'	early-mid July	SWEET Golden yellow skin with red blush; yellow flesh with sweet flavor
REGINA SEMI-DWARF	12-15'	10-12'	early-mid July	SWEET Large fruits with dark red skin; firm flesh with sweet flavor

Cherries Cont'd				
EARLY RICHMOND SEMI-DWARF	12-15'	12-15'	late June	TART Light red skin; tender yellow flesh with tart flavor
RYNBRANDT SEMI-DWARF	12-15'	10-12'	early-mid July	SWEET Dark purplish-black skin;tender juicy flesh with sweet flavor
PEACHES 5 to 15 gallon; \$8	8-\$18	37 Pea	ches are con	sidered to be mostly self-fruitful.
				are planted for cross-pollination.
BELLE OF GEORGIA	10-12'	12-15'	early-mid-Aug	Yellow skin with red blush; freestone, firm white flesh with sweet flavor
BLUSHING STAR DWARF	10-12'	10-12'	mid Aug-Sept	Purplish-red over cream-green skin; firm white flesh with sweet flavor; freestone
CONTENDER	10-12	12-15'	early-mid-Aug	Yellow-green skin with slight blush; freestone, yellow flesh with good flavor
ELBERTA	10-12	12-15	Aug-early Sept	Golden yellow skin with red blush;freestone with sweet yellow flesh
JULY ELBERTA DWARF	10-12	12-15	Aug-early Sept	Large fruit with golden yellow skin with blush; freestone with sweet yellow flesh
ORING	10-12	12-15	early-mid-Aug	Juicy, sweet and firm yellow flesh with scarlet blush, low acidity
REDHAVEN DWARF	10-12	12-15"	early-mid-Aug	Yellow skin with red blush;freestone;firm sweet yellow flesh
RELIANCE DWARF	10-12	12-15"	early-mid-Aug	Yellow to green skin with blush;freestone;yellow flesh with good flavor
SWEET CAP	10-12	10-12'	late Aug-Sept	Large flat "donut" fruit with rosey creamy skin;semi-cling; juicy, sweet white flesh
WHITE LADY	-	-	July-Aug	Large red fruit; freestone; firm sweet white flesh
	10-12'	12-15'		-
PEARS 5 to 15 gallon; \$88- or cross pollination.	ΦΙΟ Ι	FORTI	lit set, plant a	at least 2 different Pear varieties
NJOU SEMI-DWARF	12-15'	10-12'	mid- late Sept	Large green fruit;sweet flavor;long keeper
SIAN,20TH CENTURY SEMI-DWARF		12-15'	early-mid Sept	Russet yellow skin; juicy white flesh with mild, sweet flavor; pollinate with Bartlett
ASIAN HARDY GIANT DWARF	8-10'	8-10'	mid- late Sept	Large, round brown fruit;sweet juicy flavor;stores well
YERS PEAR SEMI DWARF	12-15'	10-12'	mid- late Sept	Yellow skin;crisp, juicy sweet fruit
BARTLETT SEMI-DWARF	12-15'	10-12'	early-mid Sept	Golden yellow skin; buttery, juicy flesh with sweet flavor
COMICE DWARF	12-15'	10-12'	late Sept	Large greenish yellow skin with blush;sweet flavor
KIEFFER DWARF	10-12'	8-10'	early-mid Sept	Greenish-yellow skin;robust,juicy flesh with sweet flavor
OONGLOW SEMI-DWARF	12-15'	10-12'	early-mid Sept	Yellow skin with red blush; soft, smooth flesh with mildly sweet flavor
		10-12'	early-mid Sept	Red skin; crisp and tart then sweet as it ripens; canning and fresh eating
