SHUA Wooden Water Resistance Rower

Elegant Rowing

Lateral Exercise, Free Knees

The design of virtual rowing brings the beauty of elegant fitness. Comparing with standing exercise, rower is rather a lateral position exercise, and it is much lighter on the knees, which can protect you knees from gravity and double movement.

All-Round Muscle Workout

Build All Kinds of Main Muscle Groups

Wall-Leaned, Easy Upright Storage

Use the vertical storing design, it can be stored in upright position in one second, and only covers an area of 0.26m^2 . With convenient mobile rollers, move it only needs lightly lifting.

Polycarbonate Water Tank

Big Capacity offers Greater Resistance

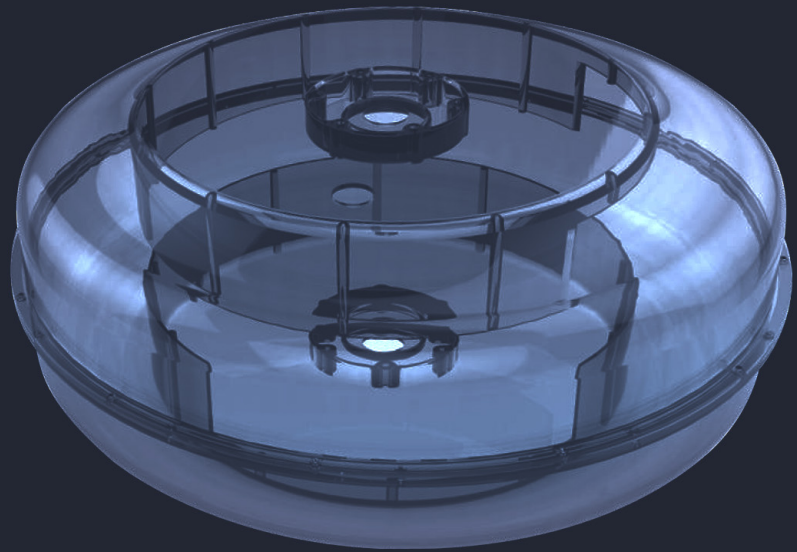

Select water tank with big capacity because it can store much more water, which gives greater resistance; It features good impact resistance, leakproof, and also more durable.

Good Water Tank,
Has to Be Durable

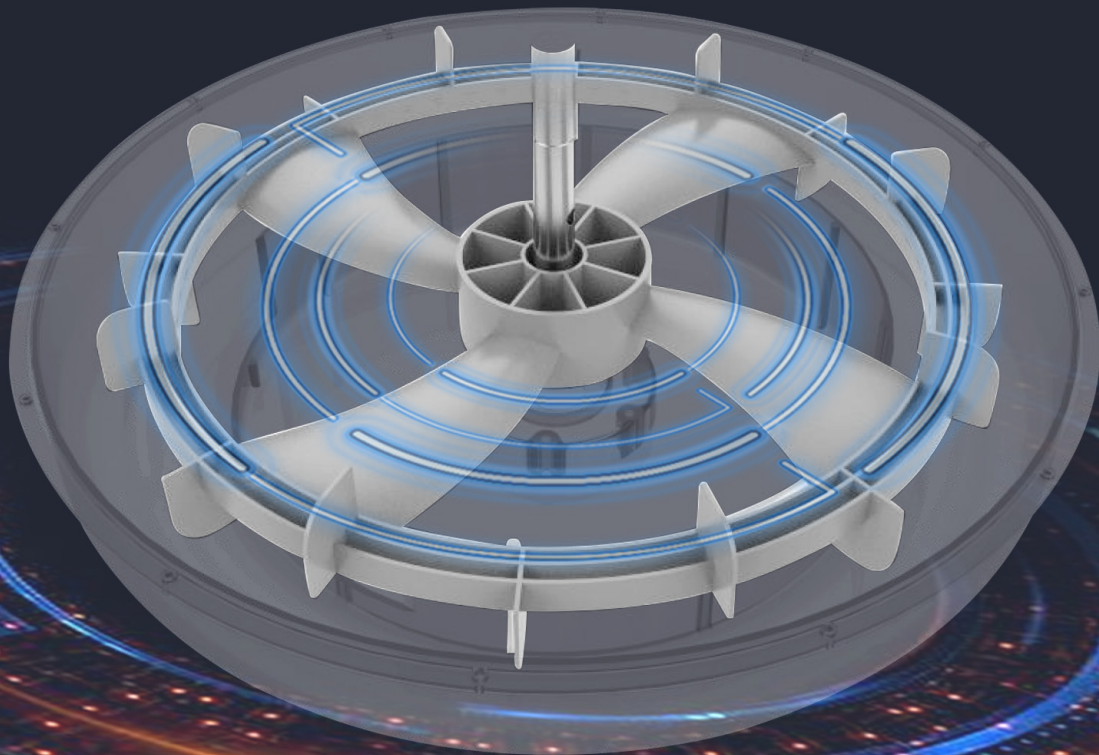

With Impact Resistance,
Durability, and Uneasy
to Leak Water for
Long-Time Use

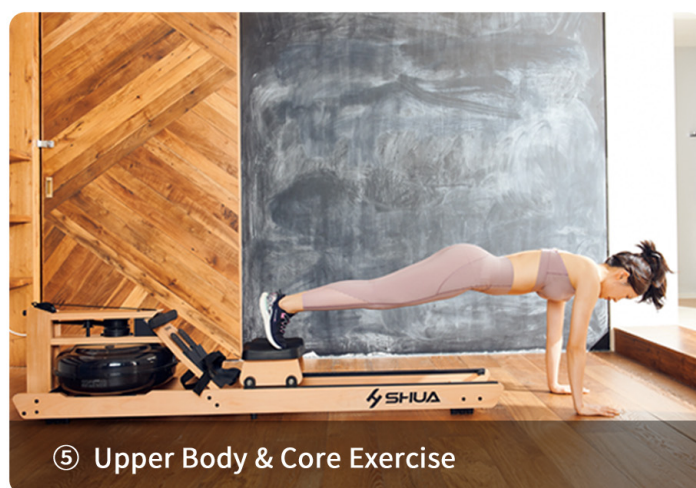

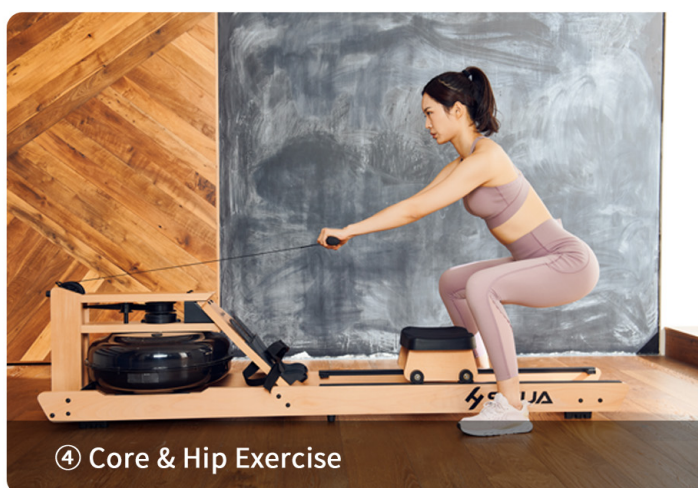

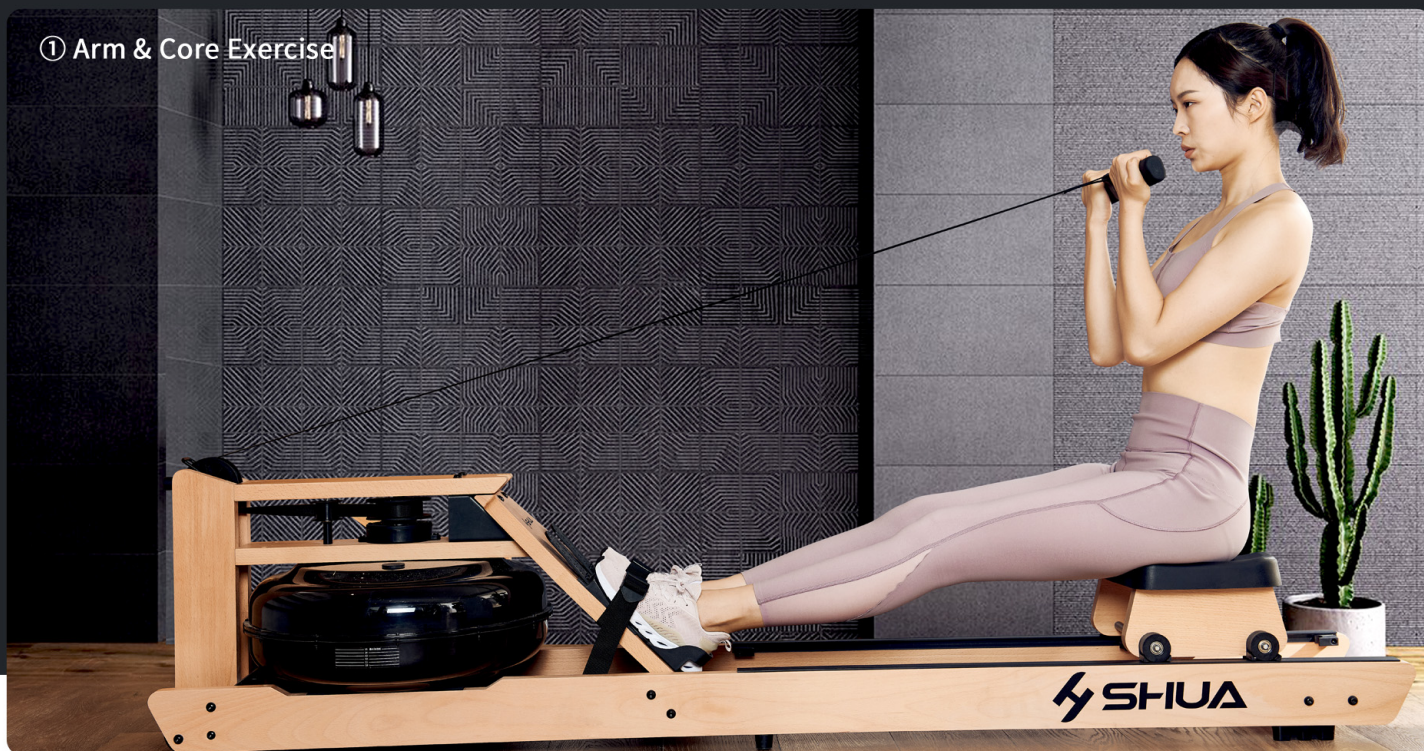

Four Paddles and Sixteen Strokes, Paddle Set More Stable When Export Resistance

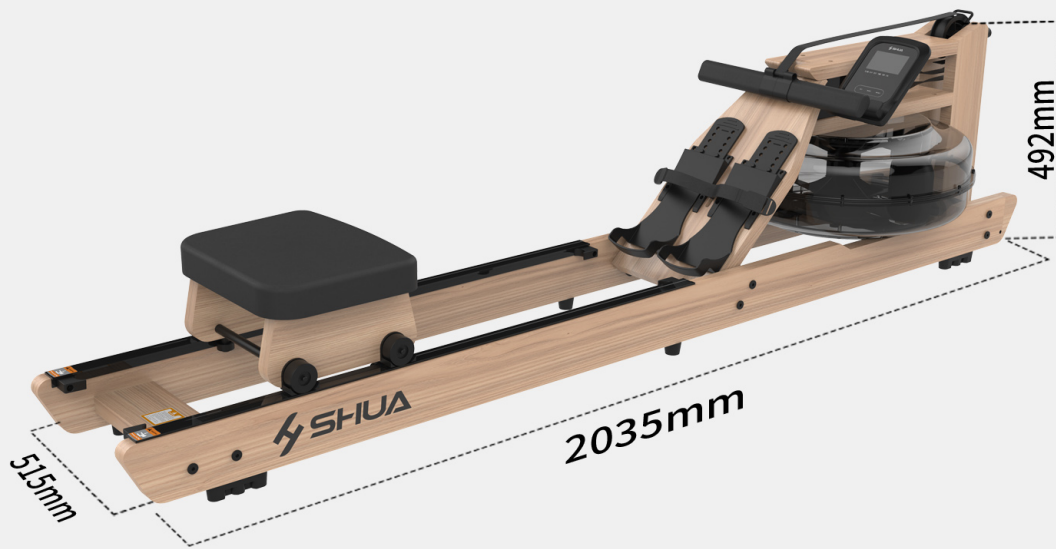

The innovative design, the four flywheels and sixteen strokes paddle set, enable paddle to fully touch and distribute water, which brings more uniform water resistance to smooth row.

Interesting Workout Unlock Rower's New Feature

More than just rowing, it has fun exercise positions for you to explore. Have a simpler and funner exercise!
