fiVO Design Secures Second Utility Patent for Its Innovative Furniture System

Andover, MA – fiVO Design (“fiVO”), a Veteran-owned furniture company based in Andover, MA, is proud to announce that the United States Patent and Trademark Office (“USPTO”) has issued the company’s second utility patent on August 19, 2025. With this milestone, fiVO now holds two U.S. utility patents and three registered trademarks, with its designs also protected internationally through the World Intellectual Property Organization (“WIPO”)/Hague International Design System.

At the heart of fiVO’s innovation is a patented joinery system that allows furniture to be assembled and reconfigured without any tools. This adaptable, sustainable approach makes fiVO’s products unlike anything else on the market, designed to fit customers’ lives today and tomorrow, while reducing waste and maximizing versatility.

According to the U.S. Environmental Protection Agency (“EPA”), more than 9 million tons of furniture waste end up in American landfills every year. fiVO’s system offers a sustainable alternative: eco-friendly materials, flat-pack shipping for efficiency, and designs that adapt across uses.

“This patent represents the culmination of a four-and-a-half year journey, and I could not be more proud to have reached this milestone,” said Stewart Junge, founder of fiVO Design and proud U.S. Navy Veteran. “From the start, my vision was to create something better for people and the planet, furniture that is truly novel, sustainable, and adaptable. Protecting this innovation ensures we can continue delivering eco-friendly designs that families can feel good about bringing into their homes, all proudly made in the USA.”

This milestone also paves the way for fiVO to expand its product line and continue challenging the conventions of the furniture industry, offering customers even more sustainable and adaptable solutions.

fiVO’s customers use its adaptable furniture system for a wide range of applications including desks, hobby and dining tables, kitchen islands, occasional pieces, bookcases, retail fixtures, and more. With one system, there are endless possibilities. fiVO continues to redefine what furniture can be - sustainable, adaptable, and beautifully different.
