Using Pre-filled Airpods

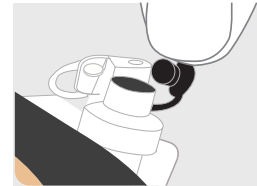

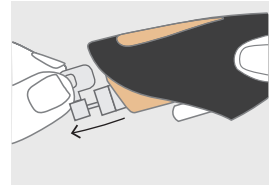

Using Airpod Pro

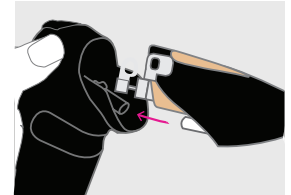

## PREP YOUR PRE-FILLED AIRPOD

Shake Airpod well before each use. Remove tamper seal and cap.

Firmly pull back on the clear loop to prime Airpod before first use only.

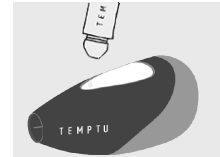

Gently open the plug before attaching Airpod to the TEMPTU One.

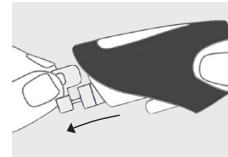

Line up the Airpod, window-side up, with the TEMPTU One. Slide and push until it clicks into place.

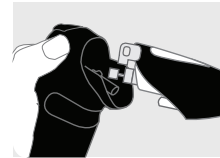

## PREP YOUR AIRPOD PRO

Remove tamper seal and cap. Prime first time only by putting 1-2 drops of S/B Cleaner over the needle in the well.

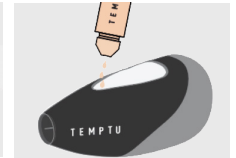

Pull gently on the clear loop once to prime Airpod Pro.

Line up Airpod Pro with the TEMPTU One and slide it into place until it clicks.

Power on and spray S/B Cleaner through.

Drop makeup into inner well until the needle is covered. Mix with a brush if custom blending.

## FOR BEST RESULTS

- Apply well cap for spill-free application
- Use one Airpod Pro per formula (one for foundation, one for highlighter, etc.)
- Clean between colors and formulas
- Only use TEMPTU airbrush formulas in Airpod Pro (other formulas may not be compatible)

## FOR BEST RESULTS

The SoftTouch Control button regulates the amount of makeup released from the Airpod or Airpod Pro. Use pointer finger to pull SoftTouch Control back slowly to build coverage to the desired amount. LESS IS MORE.

For optimal results and to avoid over-spraying, **pull SoftTouch Control halfway** down between light and heavy. Practice on your hand first to get a feel for the application.

## MASTERING A FLAWLESS FINISH

### 1-2 passes

for sheer coverage

### 2-3 passes

for medium coverage

### 3-4 passes

for full coverage

1. Hold the TEMPTU One about four fingers from the face.
2. Always keep the One moving in small, circular motions for a seamless, even finish.
3. Use a light touch with the SoftTouch Control when applying makeup to the face. TEMPTU makeup is weightless and buildable - a little goes a long way.
4. Stop and look between passes until reaching the desired level of coverage. Build coverage in layers.

## TIPS TO AVOID A WET, HEAVY OR UNEVEN FINISH:

- Do not hold One too close to skin
- Do not move in a back-and-forth motion
- Do not press too hard on the SoftTouch Control
