KO MANUFACTURING INC.

EVERGREEN

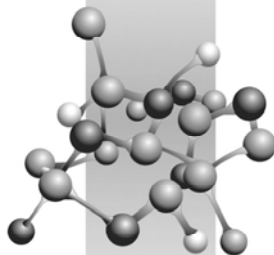

PRODUCT NUMBER 510

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability.

When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.

Techsheet Modified on 3/8/2005

PRODUCT DESCRIPTION:

Evergreen is a mildly alkaline cleaner designed for general purpose cleaning of oil, grease, and dirt. It is safe on aluminum, zinc, plastic, glass, and most other surfaces. Evergreen uses the power of citrus to break through and loosen tough oil and grease, while special emulsifiers lift away dirt and soil leaving a clean surface. It is biodegradable, contains natural citrus, and is less irritating to hands than most industrial cleaners. Evergreen does not contain any Section 313 toxic chemicals, it is phosphate free, and does not contain any phenols (a reproductive inhibitor to aquatic life).

INSTRUCTIONS:

Evergreen can be used direct or up to 5:1 with water, depending on type of soil.

For best results, use hot water.

Suggested dilutions only. Use as a starting point. Adjust accordingly for best results.

CUSTOMER BENEFITS:

- Biodegradable.
- Contains the power of Citrus.
- Less irritating than most industrial cleaners.
- Safe on most surfaces.
- Does not contain any Section 313 Toxic chemicals.
- Does not contain any phenols.
- Phosphate free.
