KO MANUFACTURING INC.

VENT HOOD CLEANER

PRODUCT NUMBER 220

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability.

When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.

Techsheat Modified on 12/16/2002

PRODUCT DESCRIPTION:

Vent Hood Cleaner is a heavy duty degreaser with tough acting water-soluble solvents to break and release grease, cooking oils, fats, and carbon from vent hoods and stainless steel equipment in restaurant kitchens. This versatile degreaser has good foaming for excellent cling and soil penetration. Strong alkaline agents help melt away tough soils with ease.

INSTRUCTIONS:

Vent Hoods: Add 1 part Vent Hood Cleaner to 4 parts hot water (above 120F). Apply to soiled areas generously. Allow product to chemically penetrate soils for 15 minutes. For heavy buildups, scraping may be necessary. For light buildups, scrubbing with a hard-bristle broom will break up and loosen soil. Rinse thoroughly with hot (140F) high pressure water (1200 psi).

Caution: This product is corrosive. Be sure to wear the proper protective equipment necessary. Consult the product's MSDS for further information.

CUSTOMER BENEFITS:

- Removes tough oils, greases and fats.
- Safe on vent hoods, and other surfaces.
- Biodegradable.
- Concentrated
