The fact that the net hinges make for some cool options when it comes to game setup. You can use straight, stairs, a squeezebox, or a Hex net configuration when setting up. Have the winner of each game choose their favorite setups! The balls that come with the game are a soft foam that is basically inside-proof. The four paddles are a well-built, molded, one-piece, plastic with a padded striking surface. they are built to withstand using a racquet ball for outside events.

Pepper Pong is a well-built easily packable, durable table tennis-type game that you can play anywhere! It is worth the investment to keep both, parties at home and outings abroad entertaining. Peace_SGB
