

Looking after your towel!

Wash & Care instructions for 100% pure Cotton products
For washing we recommend a fine detergent without optical brightener.

Our products are colourfast at 60°C

Always wash as part of a full load, as this will maintain the softness of the towels., you may add other multicoloured textiles. Insufficient loading may cause pilling through rubbing with the washing drum.

After spin drying, stretch the product by hand and shake whilst still damp.

For tumble-drying, use a low heat setting only & do not dry on or near a heater. Do not overdry.

If a loop is pulled (From zips or sharp objects), cut off the pull with scissors. This will not cause damage to the fabric. Do not pull at the loops.

Please follow the treatment instructions on the care label.

- Wash normally at the shown temperature
 - Do not bleach
- When tumble drying, use a low heat setting
 - Do not Iron
- Professional dry cleaning can be used
