

## Meekai Duval

I'm from Pangnirtung and I was born in 1976; I come from a big family. I travelled around the arctic playing Inuit Games, volleyball and soccer. Now I am married with Moe Duval and we have one girl and five boys, and two grandchildren.

I work with sealskin making jackets, kamiks and mitts. Now I am in the Jewellery and Metalwork program at Nunavut Arctic College. It's the first time I've worked with tools, and I really like it! I like doing something different.

In the summertime and fall I love going camping, and also fishing in the springtime. Now I am drawing pictures of kakivaks and harpoons, animals, and people. I enjoy making jewellery designs from my drawings.
