THE PASSING OF CLASS '15

## About this CD.

A wonderful record of the graduating year from the University of Toronto. Every entry for the graduating class includes a photographic portrait and comments on the subject's academic life. There are also separate reports and listings, with photographs, of the Sports Teams, Clubs, Associations and Fraternities for the year. In addition to the President's address each College's dean has provided an address together with a photographic portrait. The book also contains many photographs of the campus. We estimate the graduating class consists of over 850 individuals, plus the various group and team pictures include under-graduates and professors.

As a consequence of being published in the second year of the Great War this Year Book also includes reports on the Canadian Officers Training Corps and Honor Rolls of former students and teachers.

In our CD reproduction we have taken care to ensure the photographs are well reproduced and that the text is fully searchable. We have also enhanced the search with our FastFind technology.

A must have for anyone researching a relative who graduated from Toronto in this year.

## THE STUDENTS' ADMINISTRATIVE COUNCIL

HIS academic year, just closing, marks an epoch in the growth and development of the Students' Council. For the first time in its history it has been authorized to levy a fee from all the male students in the faculties of Applied Science, Arts, Education and Medicine. This has provided the Council with a working capital with which to carry on its work more efficiently. It has also enabled the Council to employ a salaried permanent secretary. This has given it greater strength and usefulness as a central student organization and the various activities are more co-ordinated and centralized.

The Council has a membership of twenty-eight, composed of representatives by population from all the colleges and faculties of the University. Besides these, the President of the Y. M. C. A., and the Vice-President of the Athletic Directorate are also ex-officio members. It is probable too that the Presidents of the Engineering and Medical Societies and a representative from the University College Literary and Scientific Society will also be added. We are glad to note that this year the Ontario College of Pharmacy sent a representative to the Council and in other ways took its proper place in student affairs.

The Executive Committee or Cabinet of the Council is composed of seven members, namely, the President and Vice-President of the Council, Recording Secretary, Treasurer, convenor of the Athletic and Discipline Committee (which manages the rooting at games and sale of rooters' tickets, inter-year contests, student parades and all disturbances among the students), the convenor of committee on Literary Organization (this committee arranges the inter-university debates, the oratorical contest, and is represented on the Inter-College Debating Union); the convenor of Musical Organizations (this committee has charge of the Glee Club, which, unfortunately, is dor-

mant, owing, no doubt, to the military drill engaged in so extensively this year), and the General Secretary. The General Secretary is Secretary at all meetings of the Council and committees, and is also Business Manager of the various organizations to wit, "Varsity," Torontonensis, the Student's Directory, Theatre Night, the Glee Club, Rooters' Club, etc.

The "Varsity" has had probably the most prosperous year in its history, in spite of the hard times prevailing throughout the country. The editorial board have worked faithfully and skilfully, and their efforts have been crowned with a full measure of success. It is read eagerly by both faculty and students and is attracting considerable attention down town. It is becoming a real necessity to the undergraduate and is hence a great unifying force in the University.

Torontonensis, the volume in which this article appears, speaks for itself. At the time of writing it is impossible to predict with any degree of certainty the financial success of the book, but we have reason to believe that it will be a very great success.

The Students' Directory is another landmark for this academic year. It has become an official publication, containing the names, addresses and telephone numbers of every student in the University, together with the more important organizations. It is very much superior to that of former years, but there are some improvements yet to come with next year's book.

The Athletic and Discipline Committee are to be complimented on their work this year; the management of Rooters' Practices and sale of Rooters' tickets was exceptionally good.

A very important step was taken this year when the Caput gave the Council control of the discipline in the University.

## THE ENGINEERING SOCIETY

THE Engineering Society of the University of Toronto was founded in 1885. It thus enjoys the unique distinction of being the oldest Engineering Society of Canada. For three years Dean Galbraith occupied the President's chair, and then placed the organization wholly in the students' hands. During the years that followed the Society received the Dean's most hearty support. It also found him ever willing and desirous that it assume added power and responsibility.

The number of members has increased during these years from approximately thirty to eighteen hundred and forty-two. The membership is composed wholly of and restricted to graduates and undergraduates of the Faculty. Such a potent factor has the organization become in the "School" it has been truly said: "Dr. Galbraith and the Engineering Society have been the two great forces making possible the Faculty of Applied Science and Engineering as it stands to-day.

The great power of the Society in the "School" and throughout the University lies largely in the unity of purpose maintained at all times. Through all these years the Engineering Society has been the one and only student organization of the "School." By means of the various Clubs—Civil, Electrical, Mechanical, Chemical, Mining and Architectural, the interests of the varied bodies are served through sectional meetings of each. Once a month they join in a general meeting of mutual interest to all and open to the public.

A few of the leading speakers this year have been: Hon. W. H. Hearst, Premier of Ontario; Sir Adam Beck, Chairman of the Hydro-Electric Commission; F. A. Gaby, '03, Chief Engineer Hydro-Electric Commission; G. H. Duggan, '83, Chief Engineer Dominion Bridge Co., Montreal; Dr. T. Kennard Thomson, '86, Consulting Engineer, New York City; W. A. MacLean, Provincial Highway Engineer of Ontario;

M. J. Butler, C. M. G., President Canadian Society of Civil Engineers; T. R. Deacon, '91, President Manitoba Bridge and Iron Works and ex-Mayor of Winnipeg; and J. L. Weller, Engineer-in-charge of Welland Ship Canal.

The Society moreover conducts its meetings in a manner to encourage and facilitate public speaking among the students. Teams participate in inter-year debates for the graduates' trophy. The Society is also creditably represented in the Intercollege Debating Series.

For the benefit of the undergraduate members the Society maintains a department where the students conveniently purchase all "School" supplies at practically wholesale prices. Adjacent also is the library and reading room.

To the Engineering Society is largely due the credit for the strong bond ever existent between all "School" men. Each being a member of the one organization, graduates are kept in close touch with each other and with the undergraduate body. For this purpose a monthly journal, "Applied Science," technical in nature, is published. It contains articles of mutual interest, "School" news and revised addresses and information regarding the graduates.

The annual social functions, the Engineering Dinner and Dance, give added opportunities of renewing acquaintance and further strengthening the fraternal bond.

An additional work was this year assigned to the Engineering Society, that of recruiting its undergraduate members for the Canadian Officers' Training Corps. Efficiency and unity of spirit was demonstrated in its securing 497 men to train. This being the largest percentage of any Faculty of a Canadian University to join the C. O. T. C.

# Chemists & Miners

Russell D. Jones

H. Kohl

Ian Macdonell

F. L. Mills

## JONES, RUSSELL D.

*"We leave his praises unexpressed  
And leave his greatness to be guessed."*

"Russ" was born in Galt, Ont., but after three months of idleness he migrated to the city of Toronto, where he has lived ever since. He received his early education at Parkdale Collegiate, and after matriculating joined the "School," casting in his lot with the miners. Here's to success.

## KOHL, HAROLD

*"Friendship's the wine of life."*

Kohl, 1889. King was born in Austria, educated in Toronto, and finally landed at "School" in the Department of Applied Chemistry. Being an expert in the gentle art of wrestling, he held the University Championship in 135 for three years, gaining his "S." So difficult problems in chemistry form an easy wrestling match for him.

## MACDONELL, IAN McLEAN

*"There's all of honesty, manhood, and good-fellowship in thee."*

Ian Macdonell staked out his claim in Toronto back in '95, and since then has been successfully working towards Law. After spending six years at U. C. C. he entered the School with Class '15 in Mining. Besides Honors each year and an active participation in athletics, he was Recording Secretary for the Engineering Society and a member of his Class Executive.

## MILLS, FRANK LEON

*"Deepest rivers flow with least sound."*

Born in Brantford, 1890, he early displayed remarkable mechanical ingenuity, and broadened his knowledge by two years' work on mechanical design in the Universal Signal Company. In this work he showed ability to apply his inventive genius to get practical results from a commercial standpoint.

## MORRIS, WILFRED D.

*"Science is busy with the hither-end of things,  
not the thither-end."*

Industrious W. D. hails from Warwick West, Ont. He attended Watford High School and matriculated in '08. In '09 he graduated from London Normal, and in the fall of 1911 enrolled in School in Analytical and Applied Chemistry. Morris has a very jovial manner, which has made him very popular amongst his fellow-students, who are assured of a bright future for him.

## MUIR, J. MURRAY

*"My life is one dem'd horrid grind."  
—Dickens.*

J Murray Muir was born in Toronto in 1892 and received all his education in this city. Being of a versatile nature, he found it difficult to select his life work, but has applied himself none the less vigorously and creditably to his chosen course—Mining Engineering. Murray, however, has not neglected development in other lines, and will never be a mere scientist.

## POWELL, WILLIAM D.

*"Oh! why should life all labour be, and pleasure never?"*

Powell hails from Hatchley, Ontario. Entered the School with Class '14 in Mining Engineering, but before proceeding far he saw the error of his way—and waited for Class '15, with which he now graduates. Here's to his success.

## ROSS, JOSEPH

*"A better fellow it were hard to find."*

Ross entered School with Class '14, and since he has lived in Toronto for many years, his biography will be an illustrious one. He finally transferred to Class '15 Chemists and Miners, with which he now graduates. May success attend him.

W. D. Morris

J. Murray Muir

W. D. Powell

Joseph Ross

MILITARY training is for this year the predominant factor in the University. It is certainly remarkable to see nearly two thousand men marching here and there on the great lawns. We owe to their help and support every sacrifice that we can make. Toronto is taking its place side by side with Oxford and Cambridge as a home of a patriotism that sets a worthy example to the whole Empire. We do not fear but that our men will do us honour in the sternest days of trial. Before many months have passed may we welcome them back again as victors in the greatest war which the world has ever seen. Their names make up a great roll of honour.
