

Bowel function and immune support

Aloe Ferox Bitter Caps is formulated with more bitter extract than our **Original** Whole Leaf Caps, for clients who want a higher concentration of the specific nutrients concentrated in the bitter sap of the Aloe Ferox Leaf, without the need to swallow more capsules.

Aloe Ferox Bitter Caps also contains the leaf gel matrix to provide the complete array of vitamins, minerals, fatty acids, amino acids, polysaccharides and fiber. The natural "whole leaf" provides a complete multi-vitamin.

Aloe Ferox Bitter Caps provides a natural enzyme form of vitamins and minerals that support whole body health with a focus on normal daily bowel and immune function.

What makes Aloe Ferox Bitter Caps unique ?

No heat is applied in drying the bitter sap and the leaf gel is milled to a fine powder suitable for encapsulation without flow agents. Our Aloe Ferox leaf powder and bitter extract powder are derived from wild-grown organic Aloe Ferox leaves.

Aloe Ferox Bitter Caps are encapsulated without excipients and bottled in Miron Violet Glass for maximum potency and freshness.
