

ZIRA COLLECTION

Each rug in the Zira collection has unique qualities. Every rug is truly one of a kind. The hand braided jute is woven in an ancient fashion which is prone to bowing and skewing. This creates an inconsistency in the linear 4" braid.

Natural jute fibers are generously woven in and may sprout where short ends are tied and tucked during the weaving process. Husks of the jute plant, which are coarse and darker in color, may be found within the weave. Variations in color are common to all natural fibers

Zira is not suitable or recommended for broadloom installation when seaming is needed.

These natural characteristics of Zira are embraced and even cherished as they undoubtedly display the hand crafted nature of every floor covering.
