

## ECLIPSE COLLECTION

Each rug in the Eclipse Collection has unique qualities. Every rug is truly one of a kind. The tiny braid-like soumak weave is meticulously handwoven at the rate of 2" of rug material per day. The value of this time-honored practice cannot be overstated.

Natural hemp fibers are inherently different thicknesses. This creates texture and inconsistencies in the weave itself. Variations in color are common to all natural fibers as well. These characteristics are embraced and even cherished as they undoubtedly display the hand crafted nature of every floor covering. Due to the variation in color, it is unlikely your sample will match your rug.

Eclipse is not suited for seaming in a broadloom installation and has no primary backing. All Eclipse custom rug orders must include an attached backing for structural integrity.

We hope you join us in celebrating the ownership of such fine workmanship.
