

## RHYTHM COLLECTION

The Rhythm collection is made of 100% wool in a seemingly "random" design. However, the design is not truly random. A subtle trellis pattern can be found in the Rhythm collection.

Rhythm is defined as elements used repeatedly to create organized movement. As seen in other natural fiber products, and in nature itself, there are formations that arise out of visible consistencies. During the manufacturing process, the heathered wool yarns are combined and will organically create a pattern.

Understanding and communicating the characteristics of the Rhythm pattern will enhance the satisfaction and value to your customer.

Claims will not be honored regarding the Rhythm pattern.
