LUXE FIBERS AND SHEARING EFFECT

Meticulously designed, these high fashion collections offer an assortment of colors and silky textures. Luxe fiber collections add a flair of style and elegance to your home.

Luxe Fiber Collections:

- **Are hand sheared.** The hand shearing technique uses a flat shearing machine that creates distinctive variations in the pile.
- **May have lines present in the carpet or custom rug.** Lines are not considered a defect but an effect of the manufacturing and shearing process.
- **Will not have a particular design or repeat.** The shearing technique creates variations in luxe fiber carpet and will vary between rolls, within rolls, and within a custom rug.
- **May contain striations and variations in color.** These are inherent and considered normal. Variation in texture and shading creates a distinctive, interesting character unique to every order.
- **May be susceptible to loose or pulled yarns.** These collections are made from "soft" nylon and polyester yarns. Luxe fiber products have a delicate pile and may not be suitable for every lifestyle.
- **Are intended for residential use in areas with light traffic.**

Communicating the characteristics of luxe fibers will enhance the satisfaction and value to your customer. Fibreworks will not honor claims for lines, striations and variations in color, pile, or inconsistencies in shearing. Seaming luxe fiber carpet can be visible. Not all products are recommended for seaming. All seams are made at the discretion of the purchaser.
