

THE LINDLEY COLLECTION

The Lindley Collection is a hand loomed product created by a weaver who is pushing and pulling the loom. The heavy weft yarns that create this intricate diamond pattern are inserted by hand. This manual process causes some yarns to cross over or under other yarns within the same loop. Due to the nature of hand loomed construction, loose yarns may result from uneven tension and are not considered defects.

Additionally, these less taut yarns may not be perfectly aligned along the serged edge or binding. Never pull your custom rug by the edge and avoid repetitive vacuuming over the edge.

Seaming natural fiber carpet or rugs can be visible. Lindley is not recommended for seaming. All seams are made at the discretion of the purchaser.

This product is intended for residential use in areas with light to moderate traffic.

Communicating the characteristics of the Lindley Collection will enhance the satisfaction and value to your customer. Fibreworks will not honor claims on the Lindley Collection for overlapping or loose yarns inherent to the nature of hand loom construction.
