OPERATION:

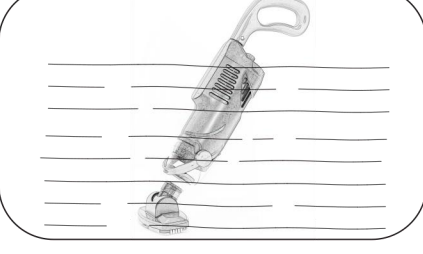

1.With handheld handle.
Attach the hand held handle by pressing spring button and inserted it into the back handle of the main body.

Make sure cleaner facing downwards when it is placed or removed from pool, otherwise it may bend the pole and damage the pole connectors.

1.Check the locking handle is in front of the cleaner head and make sure it is tightly locked.

2.It is important to make sure the locking handle into place before placing the cleaner in the water, as shown in the picture above.

3. IMPORTANT NOTE:
The cleaner will not work unless the body is submerged and filled with water.

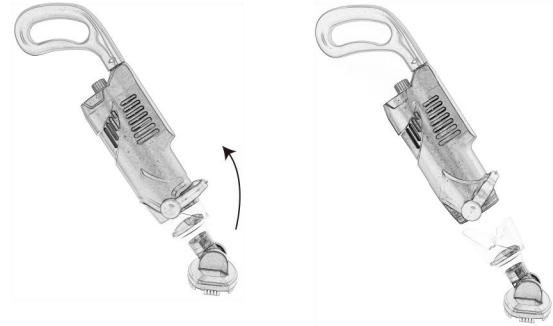

Turning off the power underwater and standing still for 2s can effectively prevent the problem of sediment leakage when lifting the product.
