

VE SERIES 1 BLUETOOTH ADDON MODULE

By HOLDCOM AUTO PARTS

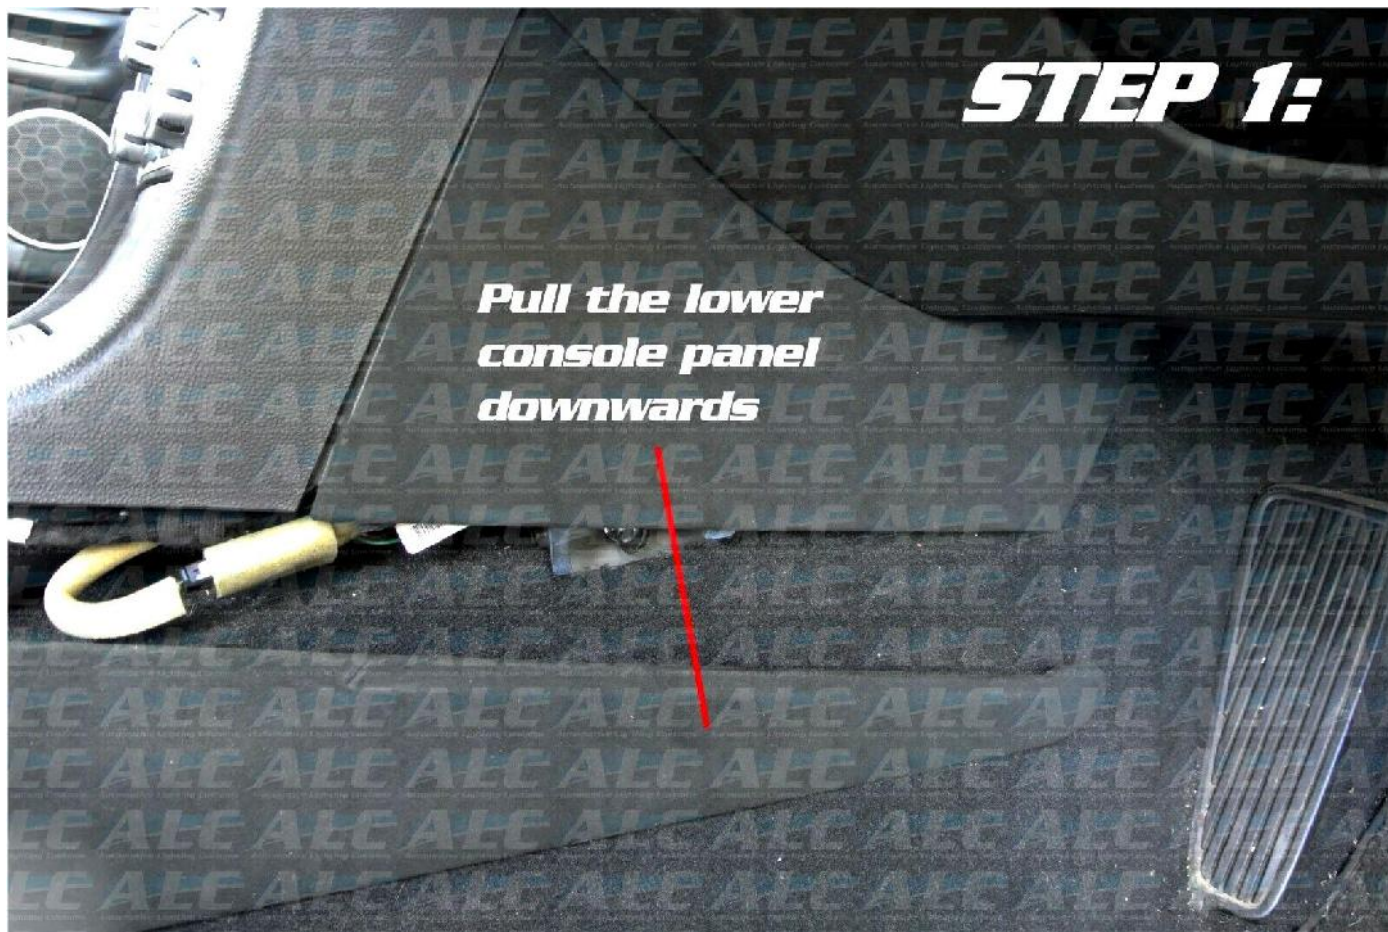

www.holdcom.com.au

***Fits all these Series 1
head units in any colour***

STEP 1:

***Pull the lower
console panel
downwards***

STEP 2:

***Pull the upper
console trim down***

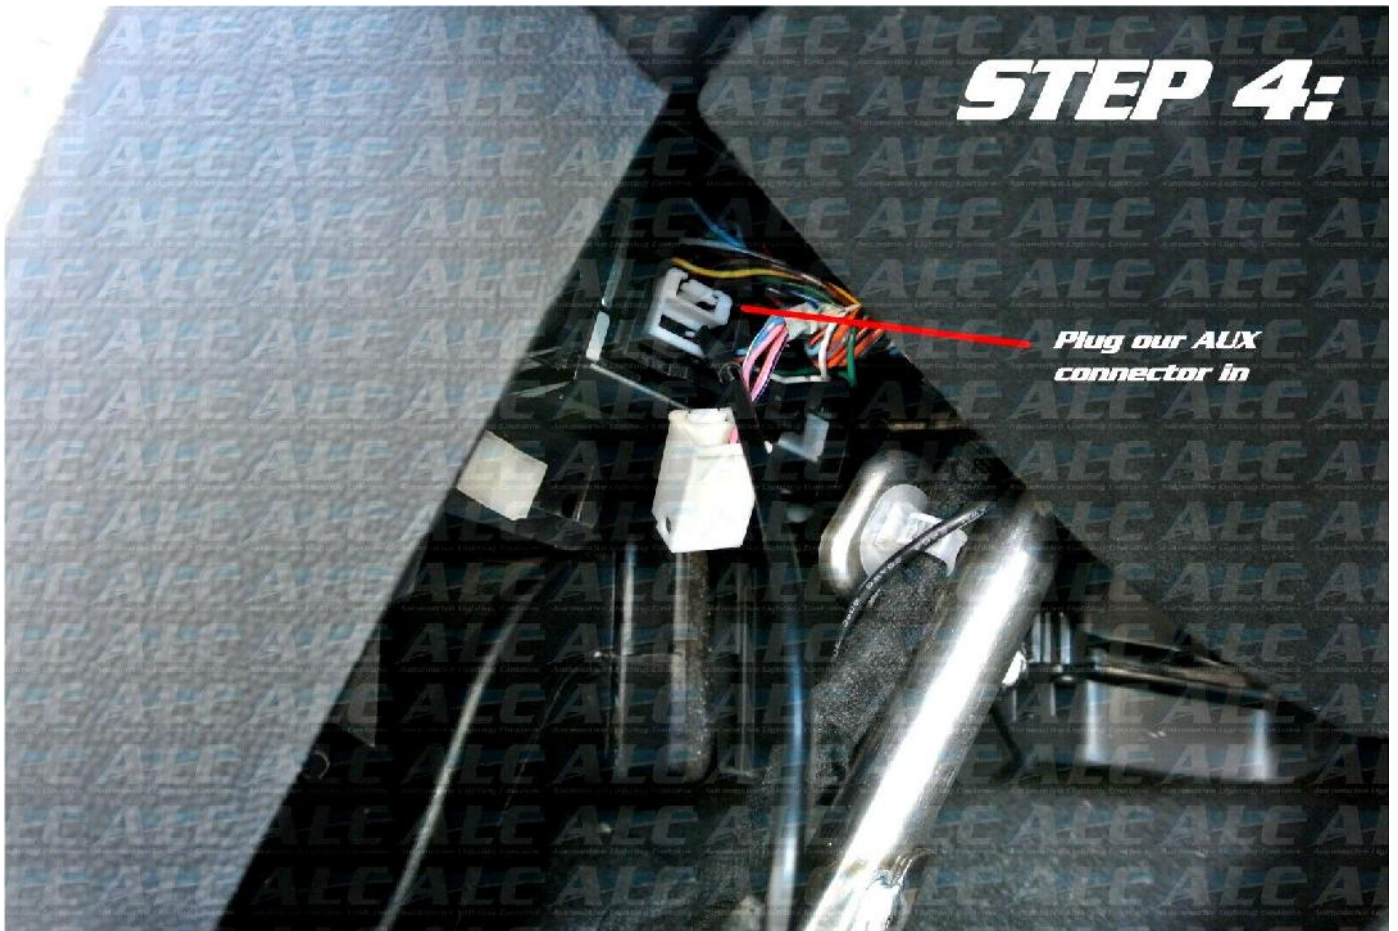

STEP 3:

Push down on the tab of the little white connector and pull it out.

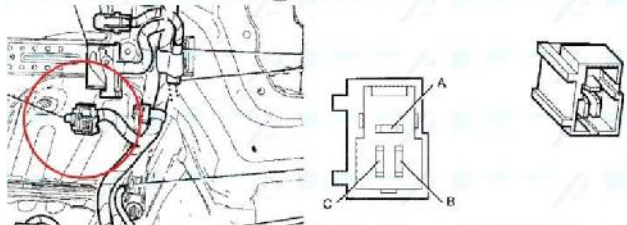

STEP 4:

Plug our AUX connector in

Push the circled connector below towards the rear of the vehicle to remove it from the bracket. It can be a bit stiff on some vehicles

Connect the terminal on the red wire to Pin B brown/ yellow

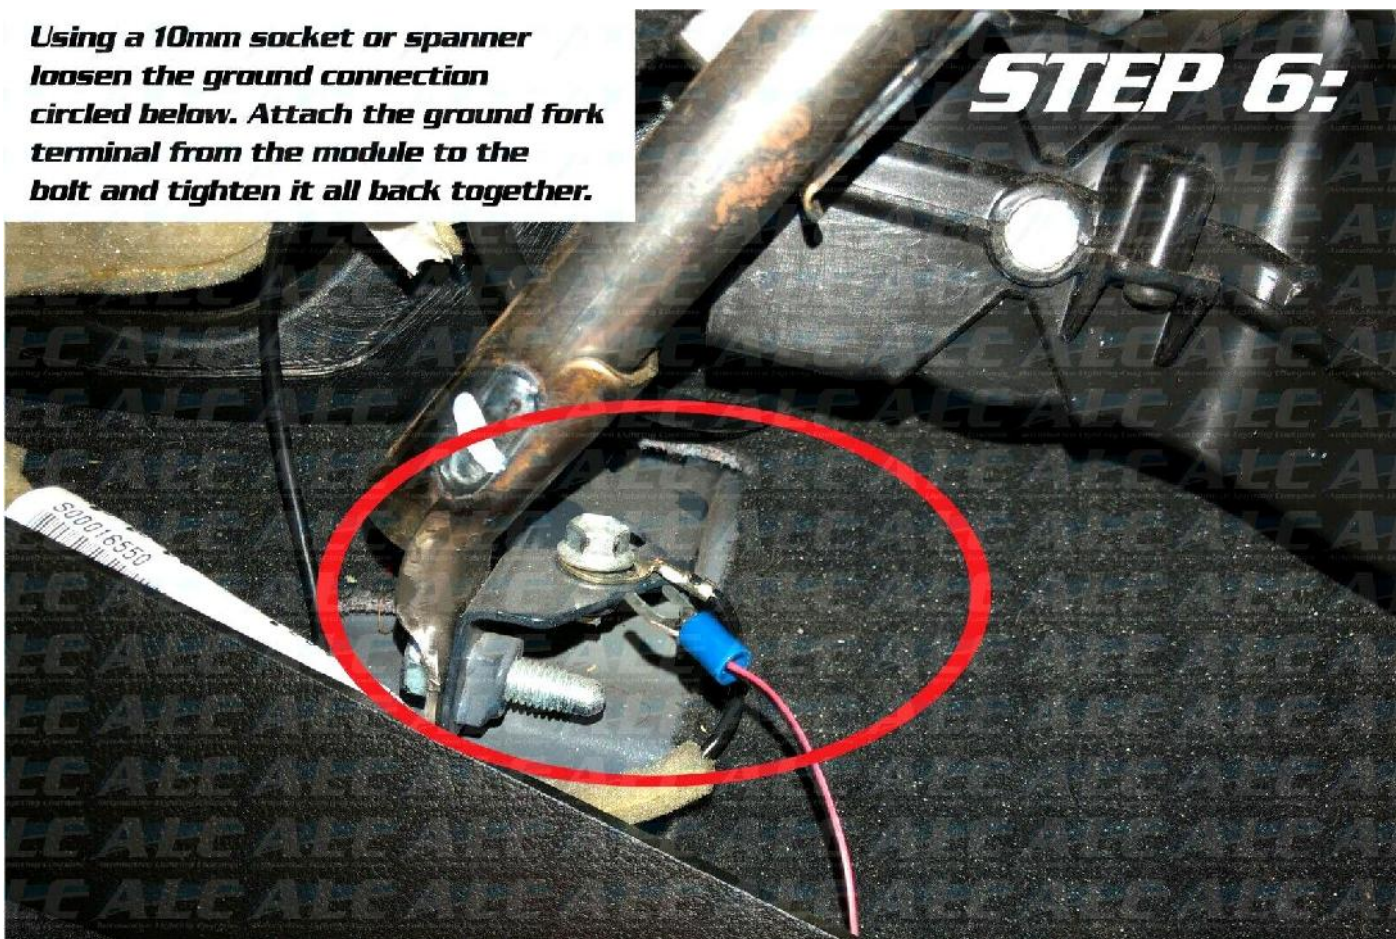

STEP 5:

Using a 10mm socket or spanner loosen the ground connection circled below. Attach the ground fork terminal from the module to the bolt and tighten it all back together.

STEP 6:

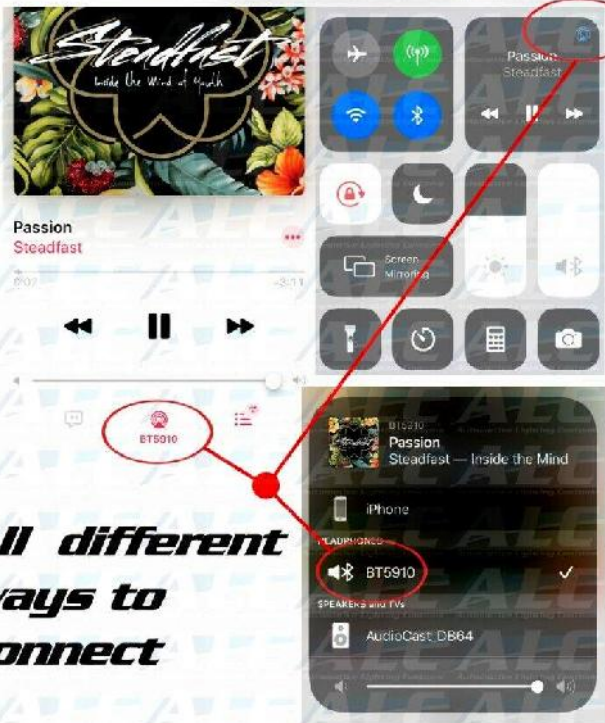

Head into you bluetooth settings and connect to BT5910 or similar.

Here we show what this looks like on iPhone, although it's a similar process for Anroid users.

Make sure your the bluetooth module is selected as the output device when playing music.

STEP 7:

All different ways to connect

Go into the head unit's settings by pressing the tune knob in.

Scroll down to Rear AUX, and turn it on.

This is the same for unit's without a colour LCD screen.

ENJOY!

STEP 8:
