

# CRATE SKATES

## Product Overview

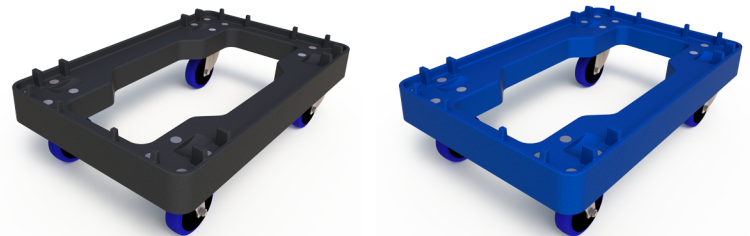

A Plus Plastics range of skates have been specifically designed to provide a solution to the transportation of crates. They have many unique features and benefits making it a very attractive product to anyone using material handling products.

Made from foam filled recycled Polypropylene with a load rating of 600kgs means it is very heavy duty but still much lighter than the steel dollies on the market. More importantly it is a much more economical option to anything else available without quality being sacrificed.

The skate's castors are the key having zinc plated steel fasteners with "nyloc nuts" giving it a long life even under a consistent heavy work load. These castors make the skate easy to manoeuvre, however with the Crate Skate's rounded corners it will always minimise any bump damage. The Skate comes standard with two back brakes to secure when stopped on an inclination & stop spinning around (as would happen with one brake).

A Plus is able to provide quality in house branding in the form of hot stamp or screen printing, hence providing the service to have your company logo placed on the side of your Crate Skate.

There are two versions available of this fantastic new product. One version of the Skate has been made to fit the industry standard number 10 and number 15 crates. The other version is designed specifically for the A Plus Plastics tamper proof Security Crate.

### Crate Skate : APOES - APOESSS BLUE

✓	Specifications : L - 615mm, W - 405mm, H - 190mm
✓	Pallet QTY : 40 Units
✓	Weights : 6 KGs
✓	Two brakes as standard
✓	Heavy duty load rating of 600kgs

## FEATURES AND BENEFITS

### Stackable

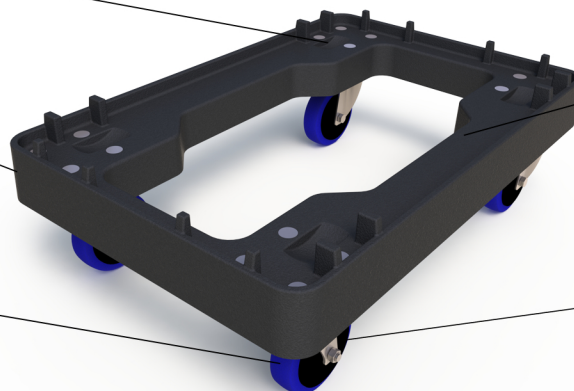

For secure storage (when not in use) through reservoirs for the wheels

### Rounded Corners

To minimize any accidental bump damage to wall, doors etc

### Brakes

Two back brakes to secure when stopped on an inclination

### Polypropylene

Made from heavy duty, durable PP Material

### Stainless Steel/Zinc Castors

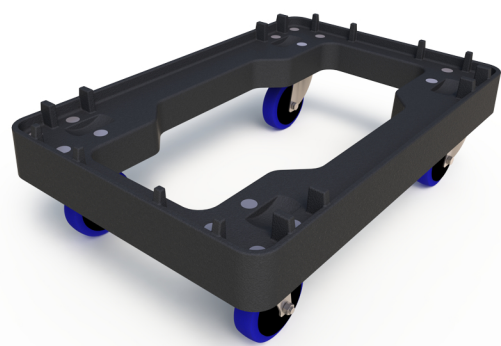

Your choice between either stainless steel (ideal for damp environments) or zinc castors

## CRATE SKATES

### TECHNICAL SPECIFICATIONS

#### CRATE SKATE : APOES

✓	Material : Recycled Polypropylene
✓	Zinc Plated Castors

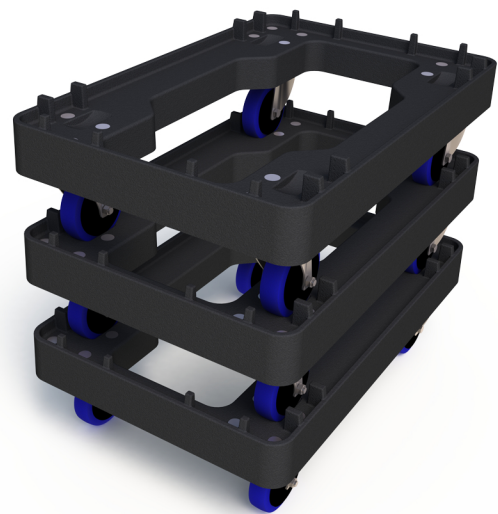

#### CRATE SKATE FOOD GRADE : APOESSS BLUE

✓	Material : Polypropylene
✓	Stainless steel castors

#### Stackable

Another handy feature is the Crates Skate's ability to stack for easy storage when not in use. Specially designed reservoirs allow for the stacking for multiple skates when not in use. This makes it perfect for document storage and or relocation companies as well as many other industries.

Below is a list of A Plus crates that are compatible with our Skates:

AP4D

AP6

AP7

AP10

AP12

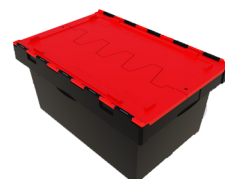

AP15

AP34

AP68
