

Brings back some normality to everyday life

Equipped with effective filter technology, sasoo demonstrably reduces the particle load in the air and thus also the risk of infection with SARS-CoV-2.

As a supplement to the usual hygiene measures, sasoo is a reliable and equally powerful companion for everyday life.

Technical data	sasoo m
Recommended room size	up to 100 m ²
Volume flow, free-blowing	2,730 m ³ /h
Volume flow, controllable	approx. 250-750 m ³ /h
Recommended room volume, 6-fold air exchange	up to 122 m ³
Recommended room volume, 4-fold air exchange	up to 188 m ³
Recommended room volume, 6-fold air exchange, boost mode	232 m ³
Power consumption	70-180 W 0.3-1.2 A
Power consumption in boost mode	771 W 4 A
Electrical connection	230 V 50/60 Hz
Volume	<49 dB(a)
Mobility	on castors
Filter 1	F7 pre-filter
Filter 2	H14-Compact filter, 13m ² filter surface
Filter 3	Activated carbon mats
Width x Depth x Height	60 cm x 60 cm x 175 cm
