

Intro to Regrouping

Question Prompts:

- Can you guess how many blocks will we have if we pack them? Have students estimate blocks, then count them.

- (using digi-block blocks) Have students check their predictions by packing as much as possible.

- What do you do when you reach 10 blocks?
- How do you know when to stop packing blocks?

- (using counter) What happens when you have more than 9 of a block?

- How can we check our answer?

- Can you draw a picture?

- (if regrouping blocks) How are you counting the blocks? Can you teach me how?
