GARDEN BEAN SPRAY PROGRAM

FERTILIZER

1. Apply Fish & Guano, 1 tbsp per gallon, when plants are established and every 1-2 weeks throughout the growing season.

DISEASE CONTROL

- 1. Apply Complete Disease Control, 1 tsp per gallon, once beans are established (approx. 3-4 weeks).
- 2. Alternate with Fungi-Max, 1 oz per gallon, and reapply every 5-7 days throughout the growing season.

TIP: A great alternative for Fungi-Max is Liquid Copper, 1 oz per gallon. These both will control rust.

INSECT CONTROL

Organic

1. At first sign of insects or when plants are established (approx. 3-4 weeks) apply Take Down Garden Spray, 2-4 tsp per quart or 8-16 tsp per gallon.

2. Alternate with Fruit Tree Spray, 1 oz per gallon, every 7-14 days.

Synthetic

1. Apply Bug Buster II, 1 oz per gallon, at 2 week intervals for complete insect, worm and mite control.

TIP: Stop applying 3 days from harvest.

SWEET CORN SPRAY PROGRAM

WORM CONTROL

Organic

Corn Earworm: Apply Garden Insect Spray, 2 oz per gallon, when you see the first sight of tassel on the stalk and silk on the corn. Spray directly on the tassel every 7 days until harvest.

Synthetic

Apply Bug Buster II, 1 oz per gallon, at 2-week intervals for compete worm control.

Tip: Stop applying 1 day from harvest.
