”

The BEST Professional Strength Stain Remover for cleaning stains off of clothing, walls, counter tops, stainless steel, glass, plastic, floors, grout, carpet, rugs, upholstery and jewelry. This product has been used in leading hospitals, medical centers, laboratories and doctor's offices worldwide for over half a century.

Helps Remove*: Red Wine, Strawberries, Raspberries, Blackberries, Cranberry, Grapes, Beets, Coffee, Tea, Fruit Punch, Pomegranate, Balsamic Vinegar, Gravy, Tomato Sauce, Grass, Vanilla Extract, Lipstick, Mascara, Fresh Hair Dye, Iodine, Blood and so much more...

Clothing

As soon as possible:

Remove excess stain. Lightly moisten the stained area with a damp washcloth. Apply a few drops or sprays of Stain Rx to a clean, damp washcloth and treat the stain area. Remember, a little goes a long way. If stain is not gone immediately, apply Stain Rx again and massage the stained area gently to loosen the stain. Always rinse out Stain Rx with water and repeat if necessary, then launder as usual.

Gold, Platinum and Diamond Jewelry

Clean gold, platinum and diamond jewelry by soaking in Stain Rx. Place jewelry into a small glass or plastic container. Submerge jewelry in Stain Rx and let sit overnight. If you are in a hurry, soak for a shorter time. Use a soft brush or cloth to clean. Rinse with water.

Carpet, Rugs and Upholstery General Stain Removal

DO NOT pour Stain Rx directly onto carpet, rug or upholstery. Remember, a little goes a long way.

For small stains: Moisten the stained area with a damp washcloth. Apply a few drops or sprays of Stain Rx to a clean damp washcloth and treat the stained area. Rinse and remove all soapy residue using the attachments from a Steam-Vac, carpet shampooer or wet/dry shop vacuum and water. Let dry.

For large stains: Vacuum the entire carpet, rug or piece of upholstery being treated and then clean it using a Steam-Vac, carpet shampooer or wet/dry shop vacuum and only water. While still moist, apply a few drops or sprays of Stain Rx to a clean damp washcloth and treat the stained area. Rinse and remove all soapy residue using the attachments from a Steam-Vac, carpet shampooer or wet/dry shop vacuum and water. Let dry.

*ALWAYS PERFORM A COLORFAST TEST on Clothing, Carpet, Rugs or Upholstery. Apply Stain Rx onto an inconspicuous area of dyed fabric and let stand 5-10 minutes. Rinse. If no change in fabric color can be detected, consider the fabric colorfast and proceed with stain removal.
