

Storage probe covers

- Protects ultrasound transducer when not in use after each disinfection cycle
- Shield® material is soft, stretchable, and resistant polyethylene
- Pull-Up™ system allows for easy insertion of probe
- Compliant with recommendations from The Joint Commission
- Fits endocavity probes and most general purpose probes
- Protects entire device, including handle
- Made in the USA

These probe storage covers are available in two configurations: Pull-Up™ and flat fold. The Pull-Up™ system facilitates easy insertion of the probe, thereby reducing the risk of contamination. These covers are recommended for use following disinfection to preserve the probe's cleanliness. In addition, they are in compliance with the recommendations of regulatory agencies, such as The Joint Commission.

Item number	Description	Pckg	Price
105.0001	Pull-Up™ cover	200/box	\$369
105.0002	Flat fold cover	400/box	\$369
