

# Ultrasound Training phantoms

- Feel like human tissue
- Emulate biopsy and puncture feeling
- High-quality material for improved durability
- Contain nerves, vessels, or lumps with different ultrasound properties
- Ideal for teaching, learning, training, or assessing purposes

Our ultrasound training phantoms provide a high-quality solution for training and practice. Designed for a variety of applications, including breast biopsies, regional anesthesia or nerve blocks, vascular access, thyroid biopsies or fine needle aspirations, and pediatric procedures. They emulate human tissue properties under ultrasound, such as nerves, veins, arteries, or lumps. In addition, our phantoms are compatible with all types of ultrasound gels due to their enhanced durability.

| Item number | Description  | Specifications                          | Pckg   | Price    |
|-------------|--|---|--------|----------|
| 304.0001    | Breast Biopsy Training Phantom w/ 11 Lumps   | 5.5" x 2.5" x 5" w/ weight of 15 ounces | 1 unit | \$390.00 |
| 304.0002    | Anesthesia Training Phantom w/ 3 nerves and 3 vessels                                | 6.5" x 1.5" x 5" w/ weight of 25 ounces | 1 unit | \$390.00 |
| 304.0003    | Universal NAV Training Phantom w/ 2 nerves, 2 veins, and 2 arteries                  | 6.5" x 1.5" x 5" w/ weight of 25 ounces | 1 unit | \$390.00 |
| 304.0004    | Thyroid Biopsy Training Phantom w/ right and left lobes, trachea, veins, and lesions | 6.5" x 1.5" x 5" w/ weight of 25 ounces | 1 unit | \$390.00 |
