

EQUIPCON

9-E Black Aerosol

#9-E

- High Sensitivity: Detects very fine defects
- Excellent visibility on white paint
- Odor Friendly: User friendly
- High Flash Point: Safe in open areas

ZChek-9-E black is a high performance non-fluorescent black magnetic particle powder suspended in the ZChek-801 cart oil. ZChek-9-E Black is used to detect surface & near surface discontinuities in ferro magnetic materials and its alloys. Will give best results when used in combination with ZChek-WP white contrast paint. **Sold as a pack of 12/17.5 oz cans.**

Directions for use: Pre-clean surface using ZChek-CR or ZChek-CL. Spray directly on part surface. Clean with a cloth or a brush. Spray on the part surface while magnetizing is on.

It is manufactured as per ASTM, ISO, AMS, ASME standards.
