

Apollo 365 Series (Module-Based UV LED Panel)

#608001 - #608002

- 2 Available Sizes
 - L (#608001)
 - XL (#608002)
- Wavelength: 365-370 nm
- UV & White Light Switch
- Customizable LED Modules
 - Atom Flood UV
 - Atom Spot UV
 - Atom White Light

The Apollo 365 Series (Module-Based UV LED Panel) is designed for versatility and reliability. Its 100% solid-state circuit ensures proper functioning even in strong magnetic fields. The panel is easily mountable for overhead inspection or in-line applications and has a large coverage area and adjustable intensity.

The Apollo Series has a rugged design with an aviation-grade aluminum housing and finned heat dissipating design, as well as a mechanical and fan cooling system. It has multiple mounting options, including chain hanging, an angle-adjustable bracket, and being extendable with standard connectors.

Manufactured as per ASTM standards.
