CH High Temp Cleaner

#CH

- Suitable up to 200° Celsius
- Flash Point: 45° Celsius
- No Residue: Better penetrant action
- Low Odor: User friendly
- Fast Action: Lower process time

ZChek-CH High Temp Cleaner is a special application remover formulated to remove penetrant from surfaces of high temperatures. This is used in the inspection and detection of weld cracks of surface of elevated temperatures. This remover is designed to be used with ZChek-PH Penetrant and ZChek-DH Developer. **Sold as an individual 17.5 oz can.**

Directions for use: Spray directly on the surface for pre-cleaning. For penetrant removal, apply indirectly using a cloth.

It is manufactured as per ASTM, ISO, AMS, ASME standards.
