

EQUIPCON

DH High Temp Developer

#DH

- Suitable up to 200° Celsius
- Faster inspection process time due to eliminating cooling time
- Brilliant White: High contrast
- Non-Halogenated: Safe on all metals

ZChek-DH High Temp Developer is developer specially formulated for detection of defects on surfaces of high temperatures. It dries quickly and is easily removable after inspection. Designed to be used with ZChek-CH Cleaner and ZChek-PH Penetrant. **Sold as an individual 17.5 oz can.**

Directions for use: Applied ONLY by spraying. Spraying can be from aerosol or air assisted conventional spraying systems. Apply directly on the test part surface ONLY after removal of excess penetrant and after drying. Apply a very thin and uniform coating to get a bright indication.

It is manufactured as per ASTM, ISO, AMS, ASME standards.
