

EQUIPCON

DL Aerosol

#DL

- Brilliant White: Excellent Contrast
- High Area Coverage: Less consumption
- Non-Halogenated: Safe on all metals
- Controlled Evaporation: Enhances complete bleed out

ZChek-DL aerosol is a high performance non-aqueous developer used in both Type 1 & Type 2 and all methods used in liquid penetrant inspection. Specially formulated to exhibit brilliant white background to enhance the visibility of indications. **Sold as a pack of 12/17.5 oz cans.**

Directions for use: Applied ONLY by spraying. Spraying can be from aerosol can or air assisted conventional spraying systems. Should be applied on the test part surface ONLY after removal of excess penetrant and after drying. Apply a very thin coat of DL to get a bright indication.

It is manufactured as per ASTM, ISO, AMS, ASME standards.
