

EQUIPCON

Densitometer

#E-DNS

- Large/Colorful LCD Screen Display
- Compact & Light Weight
- Rechargeable Li-ion Battery
- Auto Power Savings Mode

Equipcon's densitometer is a battery operated handheld unit used for measuring the transmitted density of X Ray film. It has a white illumination range of 10,000cd/m² to 50,000cd/m² and has been calibrated to achieve optimum accuracy and stability for reading density.

The rechargeable Li-ion battery can be charged with a standard USB charger which ensures an operating time up to 10 hrs.

It is manufactured as per ASTM E1079 standards.
