

EQUIPCON

# F-18B Liquid Concentrate

#F-18B

- High Sensitivity
  - Detects very fine defects
- Detects Discontinuities
  - Fine surface and subsurface
- Fluorescent Yellow Green
  - Excellent indication
- Low Background
  - Enhances inspection reliability

ZChek-F-18B is a Aquamix which is a premixed liquid concentrate of fluorescent powder, wetting agents and corrosion inhibitors to be used with water. **Sold as an individual 1 Quart Tub.**

It's a Brown Colored water based Magnetic Particle Powder designed to be fluorescing Bright Yellow Green under UV Light. It consists of ultra-high sensitivity particles for detection of very fine discontinuities in ferromagnetic materials. Special additives in F-18W provides excellent particle mobility in water mediums and avoiding flash rusting of parts.

It is manufactured as per ASTM, ISO, AMS, ASME standards.
