- 3 White Light LEDs
- UV Intensity: 4500 $\mu\text{w}/\text{cm}^2$
- Wavelength: 365-370 nm
- Rechargeable Lithium Batteries
- Blacklight Filter

The Jaguar 365 Series UVA Lamps are offered in two versions.

The Spray Bottle Version processes MPI and FPI inspections while being mounted on to a pressurized hand sprayer. The Headlight Version does the same, but it frees the technician's hands with the lamp mounted on to their hardhat.

A three-position switch on the lamp allows the selection of UVA or white light LED illumination, with the third position being the off position. The Jaguar lamps use larger UV LEDs than flashlight-styled competitors models, making them the first choice from a technician's point of view.

Manufactured as per ASTM & ISO & RRES & NADCAP & AITM standards.
