

# NF Red Aerosol (12 Pack)

#NF

- High Sensitivity: Detects very fine defects
- Excellent visibility on white paint
- Environmentally Acceptable
- Odor Friendly: User Friendly
- High Flash Point: Safe in open areas

ZChek-NF Red is a high performance Non-Fluorescent Red Magnetic Particle Powder suspended in the ZChek 801 Cart oil. ZChek-NF Red is used to detect surface & near surface discontinuities in ferro magnetic materials and its alloys. Will give best results when used in combination with ZChek WP white contrast paint. **Sold as a pack of 12/17.5 oz cans.**

Directions for use: Pre-Clean surface using ZChek CR or ZChek-CL. Spray directly on part surface and clean with a cloth or a brush. Spray on surface with while magnetizing is on. Best used with ZChek White Contrast Paint.

It is manufactured as per ASTM, ISO, AMS, ASME standards.
