NKD-019 Ultrasonic Portable EMAT Thickness Gauge
#NKD-019

- Easy to use

- Couplant Free

- Detects Flaws: 2mm and larger

- Measurement Range: 1.5mm - 100mm

- Precision: + 0.05 mm

- Transmission Rate: 4MHz

- Battery type: 8 AA's

The NKD-019 Ultrasonic Portable EMAT Thickness Gauge is a convenient, compact, sophisticated, and innovative field instrument. This instrument can be used to measure the thickness of components, pipes, vessels, and other metal objects easily and precisely. The gauge enables measurements to be taken at a vast range of surface temperatures, going from -20 to 720 degrees Celsius. As a rule, plastic coatings, paint, or limescale on the surface do not affect the results of measurements.

Meets all industry standards.
