

NKE-PCS-5000 Plate Surface Cleaning System

#NKE-PCS-5000

- Automated operation
- Low maintenance
- Protects UT sensors
- Capabilities:
 - Wide range of plate dimensions
- Specialized brushes
- Suction Nozzels

The NKE-PCS-5000 Plate Surface Cleaning System is intended for high-speed, in-line removal of dirt, dust, scale, and other foreign particles from the top plate surface.

This fully automated surface cleaning is performed at speeds of up to 2 m/s, keeping up with the most advanced production lines. Reliable cleaning of plate surfaces is achieved by applying our patented method based on the uniform and consistent application of cutting-edge methods.

Meets all industry standards.
