

## Nordiscan PI

#N-PI

- Probe Type:
  - UT
  - EC
- Weld seam tracking, visual, video
- Pipes Tested:
  - Seamless
  - ERW
  - Line Pipes (LSAW & HSAW)
- Diameter Tested: 10 mm - 1520 mm
- Thickness Tested: 0.4 mm - 60 mm

The Nordiscan-PI is our common platform for all tube and pipe inspection applications. Modular design allows the use of UT (piezo), phased array, UT arrays, EC, and EMAT technology depending on the specific tasks needed for our clients.

This equipment can be used in the production line of any modern pipe plant and perform in-depth and effective ultrasonic inspection of weld zones and HAZ, pipe ends, full body inspection, surface and subsurface, ID and OD, ovality, and thickness.

Meets all industry standards.
