

EQUIPCON

Overhead UVA Lamp

#E-UVA-1K

- 32 UV LEDs & 8 White Light LEDs
- Dimensions (Inches): 38L x 8W x 5H
- Large Irradiance Area
- Switchable between UV & White Light
- Robust aluminum housing
- Even beam profile without hotspots
- UVA pass filter

Equipcon manufactures a UVA Lamp packed with features using a panel of LEDs specially engineered for non-destructive testing applications. These versatile light sources can be installed overhead or in-line. They can be customized and configured with different numbers of lamps to provide an even wider coverage area for complete inspection.

This feature is ideal for NDT inspection booths, fluorescent magnetic particle inspection, screening of fluorescent particles, wash stations, inspection and other applications that require maximum uniformity of UVA coverage over a large area.

It is manufactured as per ASTM E3022 & E1444 standards.
