

EQUIPCON

PH High Temp Penetrant

#PH

- Suitable up to 200° Celsius
- Faster inspection process time
- Vivid Red: Offers high contrast
- High Sensitivity: Detects fine cracks
- High Flash Point: Safe to use in open area

ZChek-PH High Temp Penetrant is special visible type liquid penetrant, formulated for detecting flaws on surfaces of high temperatures. This speeds up the inspection process time by reducing the cool down time required for standard penetrant inspection process. Designed to be used with ZChek-CH Cleaner and ZChek-DH Developer. **Sold as an individual 17.5 oz can.**

Directions for use: Pre-clean the surface. Apply directly on surface being checked. Dwell time varies due to the temperature. Remove excess penetrant with a cloth moistened with cleaner. Apply thin coat of developer for final inspection

It is manufactured as per ASTM, ISO, AMS, ASME standards.
