

EQUIPCON

# QQI Shims (6 Pack)

#QQI-15/50

- Dimensions: 3/4" X 3/4"
- Thickness: 0.002" (50 microns)
- Flaw Tolerance:  $\pm$  0.5 microns
- Flaw Depth: 0.0006" (15microns), amounting to 30% of shim thickness
- Circle Diameter: 1/2" (12.7mm)
- Bar Length: 1/4" (6.4mm)

The Equipcon QQI Shims satisfies most needs because of its circular and crossed bar flow configuration which is suitable for longitudinal and circular fields.

It's artificial flaw improves inspection reliability, making it especially useful in balancing multi-directional fields. The flaw even verifies magnetic field direction and relative strength at all critical areas.

It is manufactured as per ASTM & MIL standards.
