RAM-TEST-MANUAL Portable Inspection System

The **RAM-TEST-MANUAL** is a portable manual system that's ideal for spot checks and troubleshooting in the field and new part set-up.

This portable testing tool is ideal for use in design phases, troubleshooting, and quarantine scenarios. Its portability allows for on-site and flexible use throughout the facility, offering users the convenience of on-site testing. It also empowers quality departments to establish test setups without disrupting production lines, ensuring a seamless workflow.

This system is a portable solution for Resonant Inspection, equipped with essential components such as a laptop, smart digital controller, manual impact hammer, microphone, software, and a rugged travel case, making it ideal for spot testing, part investigation, and troubleshooting.
