

Removable Fingertip Angle Beam Transducers

The **Removable Fingertip (Captive Screw) Angle Beams Transducers** are used in conjunction with a wedge to introduce a refracted shear wave into the material being tested. The standard angle beams are built to be low noise and offer substantial power.

Customizable Options:

- Composites are available upon request

These transducers are available from 1MHz – 10MHz in a wide variety of sizes.

| SKU # | Description |
|--------------|---|
| ABR-1-500-G | 1 MHz, .5" Dia., Microdot connector |
| ABR-2-250-G | 2.25 MHz, .25" Dia., Microdot connector |
| ABR-2-500-G | 2.25 MHz, .5" Dia., Microdot connector |
| ABR-3-250-G | 3.5 MHz, .25" Dia., Microdot connector |
| ABR-3-500-G | 3.5 MHz, .5" Dia., Microdot connector |
| ABR-5-500-G | 5 MHz, .50" Dia., Microdot connector |
| ABR-10-250-G | 10 MHz, .25" Dia., Microdot connector |
| ABR-10-500-G | 10 MHz, .50" Dia., Microdot connector |
