Tool Steel/Ketos Test Ring with Wooden Case #E-TSTR

- Used ONLY for DC magnetic fields
- Tested with Dry & Wet methods
- Strong durability
- Includes
 - Wooden Case
 - Certificate of Conformance
 - Wooden Box

The Ketos Ring is intended to be a quick overall system performance indicator that's used as a total system check for DC magnetic particle equipment. This item is manufactured with subsurface discontinuities which is an excellent tool that provides a quick way to confirm overall performance of your DC output machine.

This item is meant to be a quick overall system performance indicator. The ring is to be processed by a continuous method using a 1-inch diameter central conductor. It's recommended to clean this product with acetone or a cleaning solvent for better results.

It is manufactured as per ASTM E1444 standards.
