

EQUIPCON

WA-9 Powder

#WA-9

- Offers rust inhibitor properties
- White Granular Powder: Does not form cake on storage
- User friendly
- Safe in open areas

ZChek-WA-9 is a water conditioner used as wetting agent in magnetic particle inspection when water is used as a carrier. WA-9 can be used with either ZChek-F-9 or ZChek-F-18 at a recommended concentration to get desired results while using water as a carrier medium. **Sold as an individual 5lb tub.**

Directions for use: Use with 10 grams per liter of water. Stir wetting agent until dissolved. Add magnetic particles. Avoid excessive amounts of wetting agent as it will increase foaming.

It is manufactured as per ASTM, ISO, AMS, ASME standards.
