聯合國制定了一個可持續發展的框架，稱為可持續發展目標（SDGs），這是一組包含17個目標和169項目標，旨在解決全球貧困、不平等、氣候變化和環境惡化等挑戰。在試圖與這些目標對齊並創建可持續未來時，ESG（環境、社會和治理）因素非常重要。

The United Nations has a framework for sustainable development called the Sustainable Development Goals (SDGs), which are a set of 17 goals and 169 targets to address global challenges like poverty, inequality, climate change, and environmental degradation. ESG (Environmental, Social, and Governance) factors are important to consider when trying to align with these goals and create a sustainable future.
