

AXL 202

Axle Load Indicators

Designed for all trucks, prime movers and trailers fitted with air bag suspension systems, the AXL202 features a bright LED screen ensuring the display is clearly visible to operators outside the truck; day or night.

Airtec AXL units offer simple installation. Pressure sensors are directly mounted to the circuit board eliminating the use of interconnecting cables.

This dual sensor axle load indicator model is ideal for vehicles fitted with dual independent air bag suspension, per axle or axle group. The air pressure is measured through the dual inlet lines and the indicator displays the current axle load as an average.

Product Features

- Two independently adjustable alarms
- Three selectable display modes, display mode override control
- Simple 2 stage calibration process
- Universal 7~30 VDC power connection
- Super bright LED display for high visibility night or day

Technical Specifications

Construction	Rugged Stainless Steel
Dimensions	200W x 150H x 100D mm, 1.8 kg
Power Requirements	7~30 VDC
Inlet Connection	1/4" DOT FMVSS 106 push-to-connect fitting
Unit of Measurement	kPa, kilograms or tonnes
Operating Range	0~120 psi, 0~825 kPa
Accuracy ±	± 0.5 % Full Scale

Included Accessories

23.0102
Lens, plastic to fit
AXL200 / AXL202

53.0036
Chrome Cover Ring
to fit AXL

54.0102
Sealing Gasket
to fit AXL

51.3010
Fixing Bolts
