

AXL302

Axle Load Indicators

Designed for all trucks, prime movers and trailers fitted with air bag suspension systems, the AXL302 features a bright LED screen ensuring the display is clearly visible to operators outside the truck; day or night.

Airtec AXL units offer simple installation as the pressure sensors are directly mounted to the circuit board eliminating the use of interconnecting cables.

This dual sensor axle load indicator model is ideal for vehicles fitted with dual independent air bag suspension, per axle or axle group. The air pressure is measured through the dual inlet lines and the indicator displays the current axle load as an average.

With an optional wireless module available this unit can be linked with an AXM master controller.

Product Features

- Two independently adjustable alarms
- Three selectable display modes, display mode override control
- Simple 2 stage calibration process
- Universal 7~30 VDC power connection
- Super bright LED display for high visibility night or day

Technical Specifications

Construction	High Impact ABS / Polycarbonate
Dimensions	188W x 168H x 76D mm, 0.8 kg
Power Requirements	7~30 VDC
Inlet Connection	1/4" DOT FMVSS 106 push-to-connect fitting
Unit of Measurement	kPa, kilograms or tonnes
Operating Range	0~120 psi, 0~825 kPa
Accuracy ±	± 0.5% Full Scale

Included Accessories

42.1274
Power
Connection Cable

91.1064
Air Line Fitting
