

# TruckAXM

## Android Application

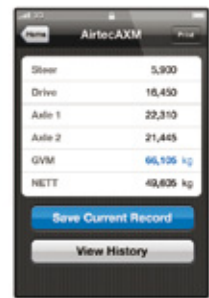

Airtec has developed the TruckAXM application for Android smart phones and tablet devices.

The application allows you to read the axle weights, GVM and NETT weight of your truck and any trailers. Airtec's TruckAXM enables you to monitor the loading of your truck in real time within Bluetooth range of the master AXM unit mounted to your cab.

Simple to use the application works on devices running the Android 2.2.+ operating system.

A low annual fee includes a secure access key and software updates.
