What is Waist Training?

Waist training is a gradual process of waist reduction using a waist-cinching corset or shapewear. The waist training practice came to prominence in Victorian times but has made something of a comeback in recent years. Wearing a waist cinching corset, exercising and eating a healthy diet can radically reduce your waist size; instantly giving you a beautiful sexy silhouette while permanently getting rid of unwanted inches around your waist.

The effect of the training cincher is three fold.

- Firstly, it aids to metabolize fat during the training session.
- Secondly, it has a positive psychological effect allowing the wearer to see what they would look like if they were able to achieve their goal.
- Lastly it trains your belly area to stay tensed and hence pulled in.
