

Are you wearing the right gloves?

Reducing hand accidents on site...

LOW CUT PROTECTION

Suitable for tasks that involve a low cut risk.

Examples:

General product handling
Warehouse or assembly line work
Low risk construction jobs
Perfect for site visitors

Ideal for trades that have a medium cut risk.

Examples:

Second fix construction trades
Mechanical and electrical trades
Steel fixing and handling materials with sharp edges

MEDIUM CUT PROTECTION

HIGH CUT PROTECTION

Best choice for higher cut risk tasks.

Examples:

Applying cladding
Handling glass or sheet metal with sharp edges
Dealing with unknown risks like in the waste and recycling industries
